Broughton Hall High School

Case Study

Overview

Type of site Education, Catholic High School
Number of users 1750 pupils and 250 staff
Number of doors 30
Location City of Liverpool, United Kingdom

Solution

"We found that a card system required a member of staff to constantly be available to re-issue students with cards when they arrived at school and realised they had either left the card at home or worse, lost it. Students are here to study and classes are disrupted when students arrive late because they have been waiting to get their access card re-issued. I visited Alsop School in late 2011 to see how their fingerprint system was working and I was very impressed by the simplicity of the Controlsoft enrolment software and the speed of identification by the fingerprint reader. We have been using our system for 12 years now and I am extremely happy. It does exactly what it says on the tin, the fingerprint readers are stylish and the students like using them. I also have the comfort of knowing that if I do have a problem, Controlsoft are at the end of the phone." Mike Clays, Facility Manager

Solution

"We are very focussed on customer training because enrolling users correctly into our software is very important" says Jonathan Summers, Managing Director of Controlsoft Ltd, "we have designed our software to be intuitive and easy to use so that administrators can enrol people and manage their access rights quickly".

> **The Controlsoft software makes administration of all the access rights very straight forward. Controlsoft provide excellent training so it doesn't take long to get familiar with how to use the software."** Mike Clays, Facility Manager

Products used

- iNet Door Controllers
- Identity Access Software
- IDEMIA Sigma Lite Biometric readers
