

Savvy Storage

Case Study

Overview

Type of site Storage Facility
Number of users 300
Number of doors 1
Location Milton Keynes, United Kingdom

Client

Savvy Storage offers a wide range of self-storage unit solutions for personal and business use.

Solution

The system was installed in 2020 with the requirement for fingerprint access to enter and exit the premises via an automated gate.

The IDEMIA fingerprint readers provide increased security to the storage facility and save cost over time as there are no on-going card costs.

Identity Access is a user-friendly, flexible networked access system, designed to make the management of users as easy as possible. It's integration with the IDEMIA

biometric range means that enrolling and managing users is simple, with a single user interface.

Identity Access has provided us an easy to use, secure and cost saving solution

Tania McIntosh, Savvy Storage

Products used

- iNet door controller
- Identity Access Software
- IDEMIA Sigma Lite
