

Overview

Type of site Assisted Living
Number of users 100
Number of doors 12
Location Tucson, Arizona

Client

Via Elegante is an Assisted Living and Memory Care community located in Tucson, Arizona. The facility houses 66 residents and uses Controlsoft's access control to ensure patient privacy and safety

Each of Via Elegante's communities is designed to provide cutting-edge care for residents in a comfortable, home-like environment, while still remaining affordable for families.

Solution

AV Specialists installed iNet controllers with Camden keypad readers for the entrance and communal doors in the building. This enables facility personnel to use their personal PIN code to move freely about the building as needed and allows families to visit without the need for

a token. Management can also view who has entered which door and run a full audit trail report if needed.

Austin Miller, President of AV Specialists, says: "Our client did not want to issue fobs to families. The Identity Access software is extremely intuitive and easy to use. We just add and delete users with a PIN code as needed. It takes a few seconds."

Via Elegante are building more locations and will be installing Controlsoft for the access control moving forward

Austin Millar, AV Specialists

Products used

- iNet Door Controller
- Identity Access Software
- Camden Keypad
